

Orange / Kiwi Peeling machine

for peeling
oranges and kiwis

To produce beautiful pieces of orange or kiwi, you need to the ideal basic ingredient: the clean, soft, fleshy part of a fruit... This can be effortlessly achieved with the new Orange / Kiwi Peeler, without compromising on quality.

The Orange / Kiwi Peeler is a fully automated decoring, peeling and top & bottom cutter. The peeler is capable of cleaning both oranges and kiwis. All that remains to be done is to cut the fruit into pieces.

After selecting the fruit type - orange or kiwi -, the dimensions and the peel thickness, the machine will process each piece of fruit into equal thicknesses. When peeling oranges, it is important to take note of variations in peel thickness.

Maximum fruit yield can only be obtained by taking these variations into account and adjusting the peeling system - the result is the unique variable peel thickness mechanism!

The Orange / Kiwi Peeler can operate as a stand-alone unit, or inter-linked with other machines. One person can operate 3 to 4 machines at a time. A stand-alone unit is equipped with receptacles; interlinked machines can be fitted with conveyor belts, one for the peeled product and one for removing the peels.

Main features of the Orange / Kiwi Peeler:

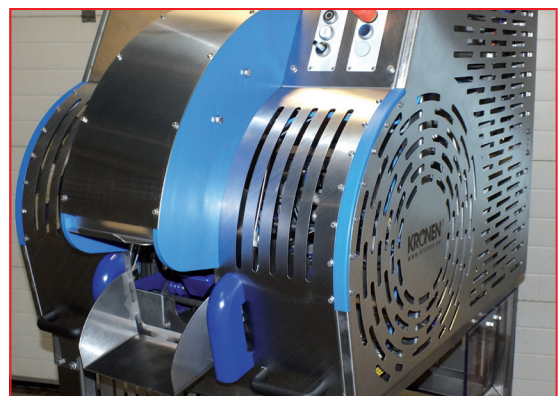

Fruit handled with the utmost care - Maximum shelf life guaranteed
Maximum yield from the fruit - Simple to operate and easy to clean
Convenient processing - Convenience Fruit!

The solid industrial machine is completely made of stainless steel AISI 304.

Technical specifications:

| | |
|--------------------------|------------------------------------|
| Capacity: | up to 6 kiwi or 5 oranges / minute |
| Product diameter: | 60 - 120 mm |
| Air pressure: | 6 bar |
| Voltage: | 400 V, 50 Hz |
| Electrical power: | 1 kW |
| Width x length x height: | 800 x 1420 x 1845 mm |
| Weight: | 325 kg |
