

# AS 4 Apple peeling & slicing machine

for  
peeling, slicing,  
wedging and coring  
APPLES

The multifunctional apple peeling machine AS 4 (table top model) is perfectly suited for processing a wide size range of apples (55 – 85 mm Ø): Peeling, coring, wedging and / or slicing in one pass ! It is simple to operate. Also, the slicing, segmenting and coring tools can be changed easily and very quickly.

## Operation

Up to 3 apples can be held at one time. There is an easy three step process:

1. Place the apple on spindle / remove slices
2. Automatic peeling and slicing
3. Cutting the core out of the fruit and, if desired, cutting into pieces with a wedging knife (bite-sized apple pieces e.g. for fruit salad and pie topping).

The core is easily separated through the tube to separate from product yield. Waste peels are separated from yield by the plexiglass shield.

Many cutting tools are available:

- 2 / 4 / 8 / 12 / 16 and 24 wedge-stars
- 3,5 / 4,5 / 5,5 / 7,5 / 10 / 14 and 20 mm slicing attachments
- 20 and 23 mm coring devices

The solid industrial machine is made of stainless steel. It has been conceived caring specially about simple maintenance, easy and efficient cleaning and is, therefore, best suitable for professional applications.

Optionally, an apple peeler without the feature to slice apples - model AS 2 - can be supplied.

## Technical specifications:

Capacity:	up to 600 apples / h
Apple size:	55 - 85 mm Ø
Voltage:	230 V, 50 Hz, 1 Ph
Width x length x height:	300 x 660 x 400 mm
Weight:	35 kg
